

DIATOMIC – Open Call for Application Experiments enabled by Advanced Microelectronics (AME) and Smart System Integration (SSI)

Starting from 15 March 2018, DIATOMIC, a pan-European network of digital innovation hubs, is looking to support innovative and scalable application experiments enabled by advanced microelectronics technologies and smart systems integration. Targeting health, agrifood, and manufacturing sectors, DIATOMIC offers up to €200.000 funding per experiment, including advanced technology testbeds, as well as tailored business support to fast-track design, development and prototyping of market-driven products and services.

- What?** Financial support of between €70.000 and €200.000 per Application Experiment; cutting-edge infrastructure, tailored business support services, cross-border brokerage, and more;
- Who?** Consortia consisting of 2 to 3 partners: SMEs (or midcaps) and research/non-industry organizations (i.e. research centres, universities, Competence Centers) coming together either as technology providers or end users; Taking advantage of advanced microelectronics and smart systems integration (health, agrifood, manufacturing);
- When?** 15 March to 15 June
- How?** Building a consortium? Get access to our brokerage services on [F6S](#);
Applying? Go to f6s.com/diatomicopencall1/apply, sign up for an account and complete the application form;

For more information on DIATOMIC visit diatomic.eu or find us on Facebook (fb.com/DiatomicEU) and Twitter (@DiatomicEU).

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 761809.
